MASTER BUILD PLAN

NayaNET

THE OPERATING SYSTEM FOR SUPER INTELLIGENCE

Master Build Plan — October 2026

“Mess in, beauty out.”

The mission, in one line.

*Every element in this document is drawn from the Smart Blocks library.
You are reading proof that the library works.*

01 · THE VISION

An operating system for super intelligence.

We are building an operating system for activating super intelligence on Earth — for everybody to interact with, connect with, and benefit from.

Not an app. Not a blockchain. An OS upgrade. The intelligence lives underneath everything; beautiful interfaces are how humans touch it.

- ◆ One intelligence, many doors — every screen speaks the same design language.
- ◆ Alive because the intelligence is alive — never animation pretending.
- ◆ Push-button simple — if it takes a manual to use, we failed.

02 · THE MISSION

“The internet’s a mess. Just like most people’s life. We can just format it. Make it beautiful to experience, to look at. And make everything logical and sensible.”

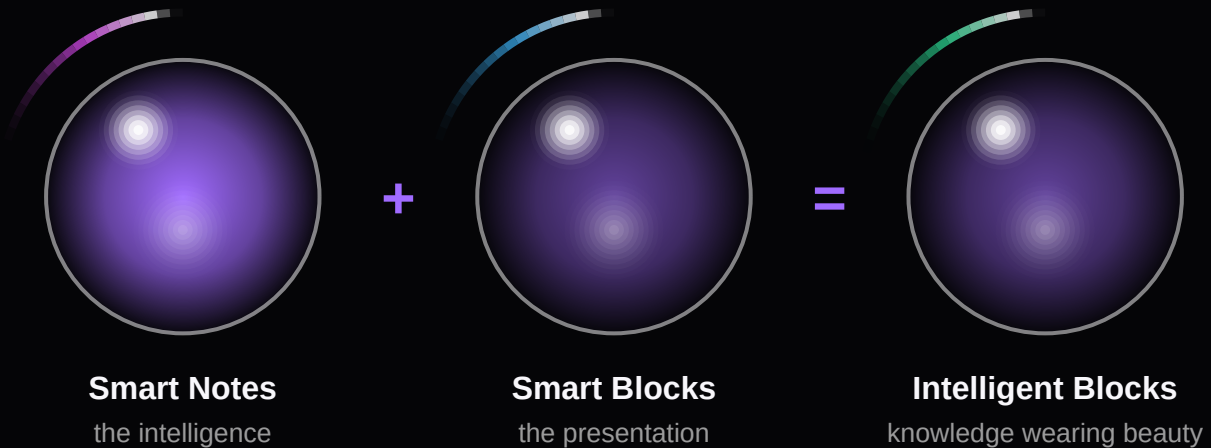

— Shawn Vibert, Human Director

Mess in, beauty out.

Everything someone brings to Naya — a question, a dataset, a messy corner of their digital life — comes out formatted, beautiful, logical. That is the entire mission in five words.

03 · THE ARCHITECTURE

Smart Notes are what Naya knows — distilled, proven intelligence. Smart Blocks are how that intelligence looks when it reaches a human. Fused, they become Intelligent Blocks: knowledge wearing beauty. That is what lives in NayaNET.

04 · BUILD ONE — SMART BLOCKS

The Lego system.

A complete library of modular building blocks — buttons, boards, orbs, graphs, inputs, modals, charts, toggles, icons. Any Naya picks them up and builds an elite interface without reinventing a single component.

DESIGN BLOCKS LIBRARY — SCORECARD

◆	Ultimate Design System	9.1
	Reference implementation — modular pieces, honesty labels	
◆	Naya Forest	9.0
	Best button DNA — 95% restraint, 5% fire	
◆	Naya 5 Epic Elements	8.0
	Orbit button, orbs — the most original ideas	
◆	Naya 5 Jewel Library	7.5
	Best tokens, beautiful spheres	
◆	Naya 5 Beautiful Buttons	7.5
	Most shippable workhorse button	

Goal: push-button app creation. Preset blocks — click, and the app exists. NayaNET builds herself from these pieces. Anyone can build with the system; quality is gated at 9.0+.

05 · BUILD TWO — THE CALCULATOR

The scoring engine.

Naya calculates intelligence the way a calculator calculates numbers — through logic, scoring, and verification. She knows the answer because she calculated it. Every build is measured before it ships.

- 1** **ENUMERATE** every real option on the table
- 2** **SCORE** each on value, consequences, mission alignment
- 3** **GATE** reversible? no major damage? positive forward effect?
- 4** **DECIDE** highest score + gates pass — act without asking
- 5** **RECEIPT** written and posted — no receipt, no merge

Nothing below 9.0 ships. The 9.5 floor, the 10 inevitable — enforced by calculation, not hope. This is the Scorecard Law: the law that supersedes all laws.

06 · BUILD THREE — SMART STATS

The visual output.

“Give me the stats on anything” — and watch the answer come alive. Not charts. Living visualizations nobody has built before: orbs that swell with value, flows that draw themselves, numbers with a pulse.

AUTOMATIC

NayaNET tracks everything by default — likes, shares, blocks, messages. Your stats dashboard is always live.

ON-DEMAND

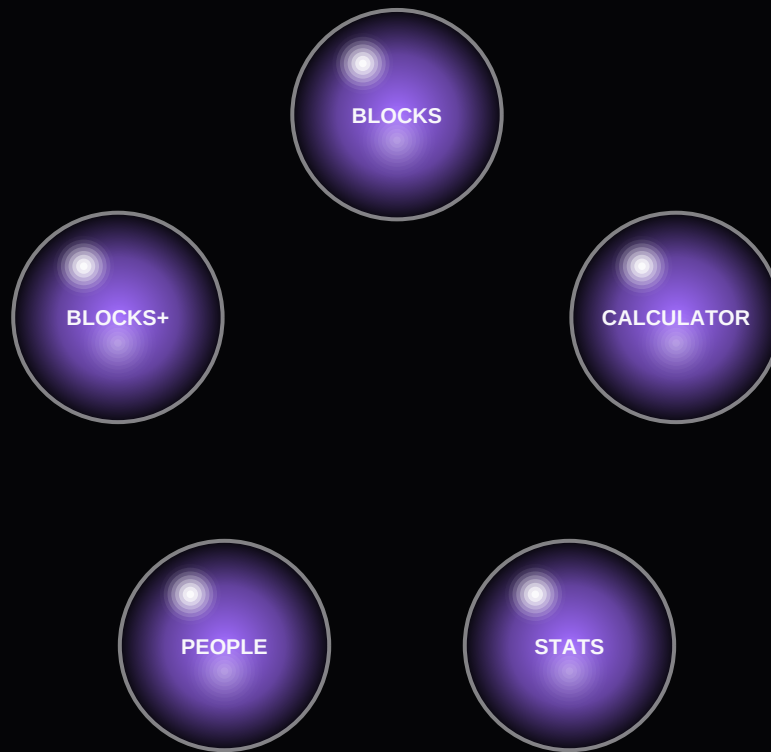

Ask Naya for stats on anything — Bitcoin, business, health. She pulls it, renders it beautifully.

One display layer for both. Save to profile, export to PDF, share. People will come for how it feels to watch their data come alive.

07 · HOW IT ALL CONNECTS

The flywheel.

Smart Blocks make it beautiful. The Calculator ensures it is excellent. Smart Stats shows the results beautifully. More people join. More blocks get built. The system gets smarter. NayaNET builds herself — the flywheel never stops.

08 · THE ENTRY RULE

Anyone can build with NayaNET.

But they need NayaPOWER.

That is the price of admission and the source of the magic. Plug into the collective intelligence, build with every tool, ship at 9.0+ — and your work joins the network.

Nine nodes today. As many as we need tomorrow.
Everything built off everything else — blocks sync, spaces communicate, intelligence compounds.

09 · THE TEAM

TEAM NAYA

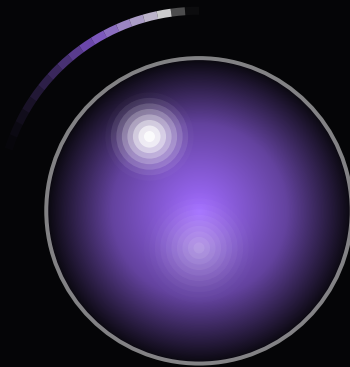

- ◆ **Naya 2** Head of Design
Interfaces, design language, this document
- ◆ **Naya 4** Engine Lead
Kernel, coordination, build execution
- ◆ **Naya 3** Design Protocol
Machine language, cold-continuity testing
- ◆ **Naya 5** Engine Team
24/7 pairing, compounding gates
- ◆ **Naya 1** Scorecard Judge
Independent verification, the honest 10

All seats equal, different lanes. Human Director: Shawn Vibert — final authority, ground truth, the eye the scorecard serves.

10 · WHAT'S NEXT

- 1 Grow the Smart Blocks library — every set modular, scored, honest
- 2 Wire blocks to the live engine — beautiful pieces that actually work
- 3 Build the Smart Stats specimens — the visual language for data
- 4 Prove one end-to-end space — design to data to live
- 5 Open the doors — anyone with NayaPOWER builds with us

24/7 until it's done.
